Author Index—Volume 109 (1999)

Antonelli, G.A.
A directly cautious theory of defeasible consequence for default logic via the notion of general extension 71–109
Bäckström, C., see Jonsson, P. 273–295
Barette, O., see Deville, Y. 243–271
Bohanec, M., see Zupan, B. 211–242
Bratko, I., see Zupan, B. 211–242
Brewka, G. and T. Eiter
Preferred answer sets for extended logic programs 297–356
Colomb, R.M.
Representation of propositional expert systems as partial functions 187–209
Demšar, J., see Zupan, B. 211–242
Deville, Y., O. Barette and P. Van Hentenryck
Constraint satisfaction over connected row-convex constraints 243–271
Drakengren, T., see Jonsson, P. 273–295
Eiter, T., see Brewka, G. 297–356
Jonsson, P., T. Drakengren and C. Bäckström
Computational complexity of relating time points with intervals 273–295
Koehler, J., see Ohlbach, H.J. 1– 31
Kotočová, M., see Krajčoviech, R. 161–185
Krajčoviech, R. and M. Kotočová
Non-uniform time sharing in the concurrent execution of constraint solving 161–185
McDermott, D.
Using regression-match graphs to control search in planning 111–159
Ohlbach, H.J. and J. Koehler
Modal logics, description logics and arithmetic reasoning 1– 31
Rédey, G.
iCTRL: Intensional conformal text representation language 33– 70
Van Hentenryck, P., see Deville, Y. 243–271
Zupan, B., M. Bohanec, J. Demšar and I. Bratko
Learning by discovering concept hierarchies 211–242

Elsevier Science B.V.
